

Creación de un sitio en GitHub

Diseño de Interfaces

Daniel Tejerizo Moretón

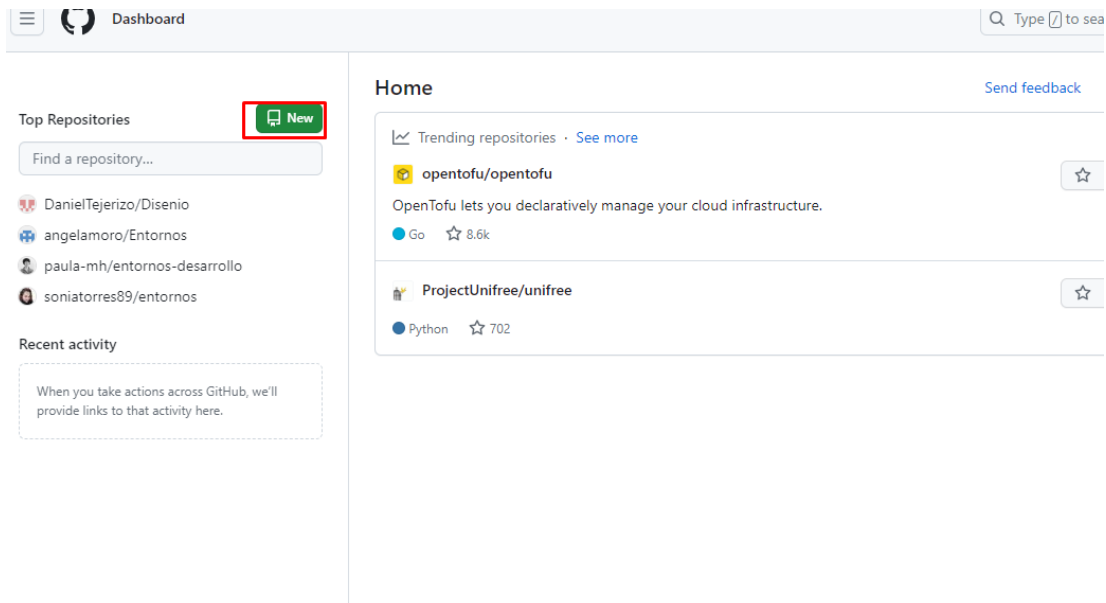

2º DAW

Primero nos creamos una cuenta en GitHub

Una vez entremos nos podria varias cosas, como correo, contraseña y cosas varias

Cuando tengamos creado la cuenta de Git, cremos un repositorio:

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner *

DanielTejerizo

Repository name *

Great repository names are short and memorable. Need inspiration? How about [effective-doc](#)

Description (optional)

☒  Public

Anyone on the internet can see this repository. You choose who can commit.

☐  Private

You choose who can see and commit to this repository.

Initialize this repository with:

☐ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None

☒  Public

Anyone on the internet can see this repository. You choose who can commit.

☐  Private

You choose who can see and commit to this repository.

Initialize this repository with:

☐ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

 You are creating a public repository in your personal account.
